Backup & Recovery Business

Automated backup operations to keep your business running

PARAGON SOFTWARE
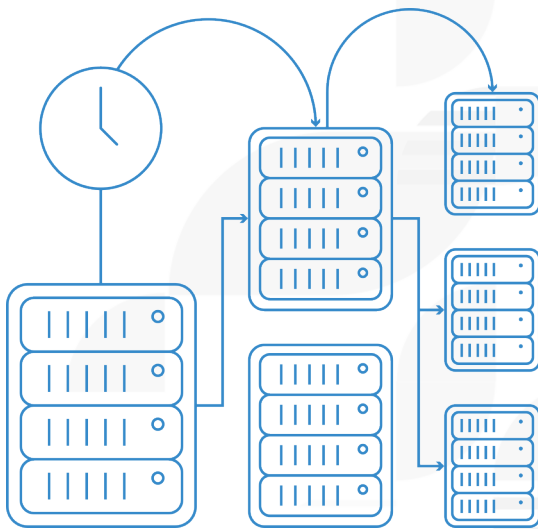

Backup & Recovery Business is a reliable backup solution with Windows Server support. Save your IT department's time by configuring and automating regular backup jobs.

Highlights

• Any existing backup technique
• Windows Server support
• Flexible licensing options

System requirements

• Windows 7 SP1 to Windows 10
• Server 2008R2 SP1 and later

• Intel Pentium III CPU or its equivalent, with 1000 MHz processor clock speed
• At least 2 GB of RAM
• During the installation additional free space (up to 1GB) will be required

Licensing

Available as a part of Paragon Hard Disk Manager Technician License.

Who benefits?

SMBs, system administrators and IT service providers.

What's inside?

Backup and Replication

• File-level and sector-level backups of physical and logical media
• Synchronization across geographical and organizational boundaries
• Virtual containers backup

Recovery

• Correction of boot problems caused by logical errors or hardware malfunction
• Recovered availability of corrupted or malware-inflicted applications
• Recovery to bare metal

Restore

• Backup and retention management for business and user data
• Improved availability of mission-critical resources
• Granular restore of individual files instead of restoring an entire image

About Paragon Software Group

For a generation, Paragon Software Group has been delivering software tools, solutions, and technologies. Our offerings range from low-level storage management and file system drivers to safekeeping and recovery of operational, business, and user data across heterogeneous platforms and environments.
