About Paragon Software Group

For 25 years, Paragon Software Group has been delivering a wide range of software tools, solutions, and technologies. Our offerings range from low-level storage management and file system drivers to safekeeping and recovery of operational, business, and user data across heterogeneous platforms and environments.

What's inside?

NEW

Advanced partitioning

Next-generation partitioning functionality

Disk Clone

New functionality to create an exact, uncompressed replica of your system's hard drive onto another drive

Revamped graphical UI

New improved color scheme, one-click access to a variety of product functions, enriched UX

Smart backup strategies

Automate backup jobs, choose a backup strategy and never worry about losing any important data.

Recovery Media Builder

Create recovery media to correct most boot problems occurring from logical errors, hardware malfunctions or failures. Recover availability of corrupted systems, granularly restore configuration, business and user data.

System and data migration

Straightforward the process of moving all contents of a disk to another storage device without having to re-install the OS and applications.

Irreversible data erasure

Wipe your corporate disks clean with industry-class wipe algorithms, before computer park utilization. Get a wipe report in PDF available, set up email notifications to email service of choice, enjoy the new secure wipe methods, including NVME and SSD secure erase.

Licensing

Available licensing options for business users:

- Standalone perpetual licence for one physical server
- Basic Technician License for recovery environment for 1, 2, or 3 years
