

# Microsoft exFAT/NTFS for USB On-The-Go by Paragon Software

GET FULL ACCESS TO ANY USB-STORAGE FROM ANDROID DEVICES

The app is a convenient method for transferring files between Android devices and removable storage media via USB On-The-Go. After connecting external storage media directly to the Android device user can work with photos, videos, presentations.

## Who benefits?

Business people, academics, students, travelers, parents – anyone who wants to store and use all kinds of files on the go.

## What's inside?

### USB storage access without computer

User is able to open, copy, move, delete and rename audio, text, video and image files directly from USB drive. Product supports mounting of popular file systems – HFS+, extFS and Microsoft exFAT / HTFS / FAT32

### Use with popular services

Upload files from external memory to Google Drive, Microsoft OneDrive, Dropbox or other cloud services. Share files via Gmail, Telegram, Skype, WhatsApp or Facebook Messenger Lite

### File manager integration

The app is fully integrated with Total Commander, X-Plore File Manager, File Manager (by Mobile Clean System Lab), OTG File Manager, and FX File Explorer.

## Highlights

- File export and import between USB drive and mobile devices
- Files accessible directly from the USB stick
- Easy file sharing to cloud services, via messengers
