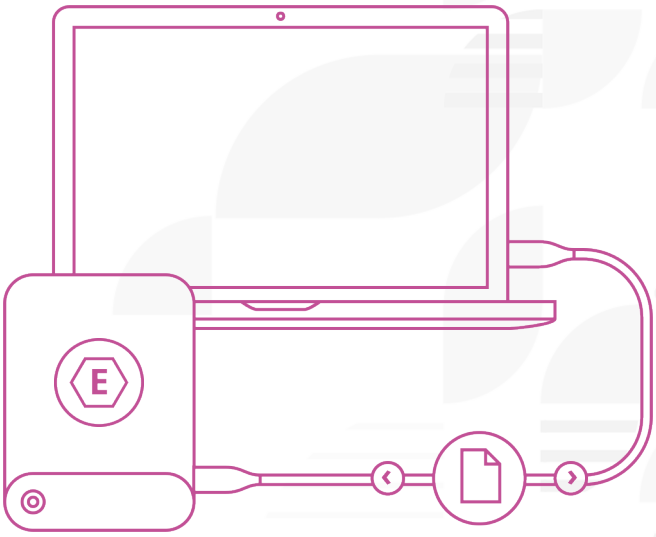
extFS for Mac by Paragon Software

ACCESS LINUX-FORMATTED FILES FROM YOUR MAC



extFS is one of the primary Linux file systems. The driver provides access to files on extFS storage devices connected to Mac computers. With **extFS for Mac** you can seamlessly write, edit, copy, move and delete files on ext2, ext3, ext4 Linux drives. The driver is part of the Paragon File System Link technology – a bevy of solutions for multiplatform access to files across Mac, Windows, and Linux environments.

Who benefits?

Home users, forensic experts, IT managers, original equipment manufacturers.

About Paragon Software Group

For 25 years, Paragon Software Group has been delivering a wide range of software tools, solutions, and technologies. Our offerings range from low-level storage management and file system drivers to safekeeping and recovery of operational, business, and user data across heterogeneous platforms and environments.
